AM SYSTEMS · INTERNAL BLUEPRINT

Your Version of CAJA Store — Without the Risk

A full feature-by-feature map of what AM Systems can build, what to reframe, and what to drop — plus how to position and price it to clients.

OVERVIEW

The CAJA Store, Dissected

After reviewing all screens, here's where each feature lands for AM Systems.

9	4	3
Features — Build As-Is	Features — Reframe / Swap	Features — Do Not Build

💡 The Strategy

AM Systems builds the **Store Operations & Inventory System** — not a "Sales System." The distinction is intentional. You compete directly with CAJA on features, but stay entirely clear of regulated financial compliance territory. Clients get 90% of what CAJA offers, positioned as an operations tool.

FEATURE MAP

Every CAJA Feature — AM Systems Verdict

Screen by screen, what to build, what to swap, and what to skip.

CAJA FEATURE	AM SYSTEMS VERSION	STATUS	NOTES
Inventory Product catalog, cost/	Build exactly as shown	✅ Build	Pure operational data. No compliance risk.

CAJA FEATURE	AM SYSTEMS VERSION	STATUS	NOTES
retail/WS price, stock, categories			
Product Editor Edit product details, barcode, pricing tiers	Build exactly as shown	✅ Build	Standard product management.
Stocktake Physical count sessions, variance tracking	Build exactly as shown	✅ Build	Operations tool. Fully saf
Restock / Delivery Receiving Log incoming deliveries, update stock levels	Build exactly as shown	✅ Build	Inventory operations, no compliance link.
Suppliers Supplier directory, contact info, product links	Build exactly as shown	✅ Build	CRM-adjacent, fully safe.
Purchase Orders Draft → Approved → Received supplier PO workflow	Build exactly as shown	✅ Build	Operational procurement tracking.
Stock Transfers Move inventory between branches	Build exactly as shown	✅ Build	Multi-branch operations. Fully safe.
Barcodes Barcode generation and scanning	Build exactly as shown	✅ Build	Product identification too No risk.
Dashboard & Analytics Operational insights,	Build as operational metrics only	✅ Build	Frame as ops data, not financial reporting.

CAJA FEATURE	AM SYSTEMS VERSION	STATUS	NOTES
stock levels, trends			
Checkout / Order Taking Product selection + cart interface	Rename to "Order Entry" — record orders, not transactions	⚠ Reframe	The UI is fine. Drop payment confirmation flo Log orders, not financial transactions.
Credits / Utang Tracking Customer credit ledger, balances, limits	Rename to "Customer Credit Tracker" — drop "ledger" language	⚠ Reframe	The utang feature is very Filipino and valuable. Jus frame it as a CRM tool, nc a financial ledger.
Returns & Exchanges Process returns, refunds, exchanges	Rename to "Return / Swap Log" — track operational events, not refund amounts	⚠ Reframe	Track that a return happened, reason, and replacement. Drop the refund amount field.
Expenses Expense tracking module	Build only as "Operating Costs Log" — no tax categorization	⚠ Reframe	Logging operational cost is fine. Do not add tax categories or compliance labels.
Payment Gateway Integration GCash, Maya live payment processing	Do not build	⊘ Drop	Requires BSP-regulated merchant agreements wit GCash/Maya. Out of scope.
Receipt Generation & Print Printable transaction slip with TXN# and totals	Do not build	⊘ Drop	Generates a document th resembles an official receipt. Regulated territo
Transaction History (Financial) Full financial transaction log with totals, payment methods	Replace with "Order History" — operational log only	⊘ Drop	A full financial TXN log fo compliance is regulated. An order log for operational reference is fine.

YOUR SYSTEM

What AM Systems Delivers

9 fully buildable modules that make a complete, powerful store operations system.

Inventory Management

Products, categories, barcodes, pricing tiers (retail + wholesale)

Order Entry

Cashier interface to log customer orders — product selection, quantity, totals

Stocktake Sessions

Physical count workflows with variance detection

Restock & Delivery Log

Record incoming deliveries and auto-update stock levels

Supplier Management

Supplier directory linked to product catalog

Purchase Orders

Draft → Approve → Receive workflow for supplier orders

Branch Transfers

Move stock between branches with transfer tracking

Customer Credit Tracker

Track customer utang / credit balances and limits

📊

Operations Dashboard

Stock levels, order volume, low-stock alerts, supplier activity

---

CLIENT POSITIONING

How to Pitch This System

The framing that gets you hired — and keeps you out of trouble.

❌ DON'T SAY THIS

- We build a sales system
- It processes payments
- Generates official receipts
- Tracks your revenue for reporting
- Replaces your cashier register
- Handles GCash / Maya

✅ SAY THIS INSTEAD

- → We build a store operations system
- → Tracks your inventory in real time
- → Logs orders and customer activity
- → Gives you full visibility across branches
- → Automates your restock and supplier workflow
- → Manages customer credit and utang cleanly

📢 READY-TO-USE CLIENT PITCH

"We build a custom Store Operations & Inventory System for your business — so you always know what's in stock, what needs to be

restocked, what's moving across branches, and which customers have outstanding credit. It's built specifically for how Filipino stores actually operate, with multi-branch visibility and supplier management built in from day one."

PRICING

Where This Falls in AM Systems Tiers

This system sits squarely in Business OS territory.

Business OS — Foundation

₱150,000

6–9 weeks

- → Inventory + Stocktake
- → Order Entry (single branch)
- → Supplier + Restock management
- → Basic dashboard
- → Customer Credit Tracker

Business OS — Full System ★ Recommended

₱280,000

10–14 weeks

- → Everything in Foundation
- → Multi-branch + Stock Transfers
- → Purchase Orders workflow
- → Full analytics dashboard
- → Return / Swap Log
- → Barcodes + barcode scanning

Business OS — Enterprise

₱400,000+

14–20 weeks

- → Everything in Full System
- → AI chatbot / alerts
- → WhatsApp automation
- → Advanced analytics
- → Multiple branch management
- → Custom integrations

🎯 Competitive Position vs. CAJA

CAJA charges a monthly SaaS fee in perpetuity. AM Systems builds a **custom, owned system** — the client pays once and owns it forever. For stores that stay in business 2+ years, AM Systems is already cheaper than CAJA's subscription model. Lead with ownership, not price.

Built for **AM Systems** · Internal Use Only · Arvin Mondano
